João Ângelo

Engineering Manager at DSwiss AG
Portugal

Resumo

Worked as a Software Engineer for 7 years with many different customer areas and product, in ETL, SQL, .NET, Javascript (Angular) and in DSwiss I ascended to Team Lead.

I was then given the opportunity to move to a management position inside the company, and I took it - becoming Engineer Manager to the company's customer teams (Web/BE/Mobile)!

I am an Engineering Manager with a strong background in Software Engineering and hands-on experience across Web, Backend, Data Base and ETL technologies. I've grown from Software Engineer to Team Lead and now lead cross-functional engineering teams in the IT security SaaS space.

I specialise in building high-performing engineering organisations through effective hiring, mentoring, and agile transformation. My work includes driving performance improvements, optimizing delivery processes, and fostering a culture of collaboration, ownership, and continuous improvement.

I adapt my leadership style to the needs of each team and situation, and I'm committed to learning, evolving, and staying current with modern engineering and leadership practices, security standards, and emerging technologies - with a current focus on AI skills.

Experiência

DSwiss AG

5 anos 2 meses

Engineering Manager

outubro de 2023 - Present (2 anos 10 meses)

Lisbon, Portugal

Development Team Lead

fevereiro de 2023 - outubro de 2023 (9 meses)

Lisbon, Portugal

Software Engineer

outubro de 2022 - fevereiro de 2023 (5 meses)

Hired by DSwiss AG directly.

Software Developer (via Nearshore Portugal)

junho de 2021 - outubro de 2022 (1 ano 5 meses)

Lisbon, Portugal

Working as a front end software developer for a Swiss IT secure digital services company (via a portuguese intermediary firm).

- Angular;
- Unit testing;
- E2E testing;
- Agile Scrum methodology.

Vaudoise Assurances

Software Developer (via Devoteam)

janeiro de 2018 - maio de 2021 (3 anos 5 meses)

Lisbon Area, Portugal

Working as software developer for a Swiss insurance company, nearshore (via a portuguese intermediary firm).

- Javascript (jQuery -> AngularJS -> Angular);
- C# (.NET Framework);
- Oracle/SQL;
- Agile Scrum methodology.

GMV

1 ano 11 meses

Software Developer

junho de 2016 - dezembro de 2017 (1 ano 7 meses)

Lisbon Area, Portugal

I have been involved in the development of web apps using SQL Server (T-SQL, SSIS, SSRS) and DotNetNuke.

Projects:

1 - Implementation of services and design of the platform for Lisbon City Hall's Management and Planning System for Interventions (SGPI)

Client: Lisbon City Hall

Dates: Jun 2016 - Dec 2017

Functions: Development, analysis and design.

Technologies: SQL Server (T-SQL, SSIS, SSRS); SharePoint 2013 / 2016.

2 - Development of website for the Cartagena Proadapt conference.

Client: PROADAPT - Inter-American Development Bank

Dates: Apr 2016 – Jul 2016

Functions: Development, analysis and design.

Technologies: DotNetNuke.

Software Engineer Internship

fevereiro de 2016 - maio de 2016 (4 meses)

Lisbon Area, Portugal

In 2015 I decided to shift from a civil engineering background to IT. After developing some academic IT knowledge online I took a short course at ISG plus a 4 month internship at the Secure e-Solutions branch of GMV.

Projects:

1 - Development of the intranet for the Inter-American Development Bank site's intranet.

Client: Inter-American Development Bank

Dates: Feb 2016 – Apr 2016

Functions: Assistance to development.

Technologies: C# (ASP.NET, MVC).

2 - Development of website for the Cartagena Proadapt conference.

Client: PROADAPT - Inter-American Development Bank

Dates: Apr 2016 – Jul 2016

Functions: Development, analysis and design.

Technologies: DotNetNuke.

ECOserviços

Civil Engineer

junho de 2013 - agosto de 2015 (2 anos 3 meses)

Lisbon, Portugal and Huambo, Angola

I worked within a team of senior engineers developing projects focused on infrastructures for water treatment & supply, as well as drainage & treatment of wastewater. The scope of my work was comprehensive within the company's expertise and the full extent of the projects.

I completed one or more projects in each of the aforementioned areas of water engineering. The clients were mainly municipal or regional authorities in Portugal and Angola.

In my time in Angola I had the chance to work directly in the field, providing technical assistance and/or inspectorate in several government works under execution in the city of Huambo Angola, whilst continuing to develop projects and proposals in the office.

LNEC

Engineering Intern

novembro de 2011 - novembro de 2012 (1 ano 1 mês)

Lisbon Area, Portugal

Integrated in the Ports and Maritime Structures section of the Hydraulics department of LNEC, I developed extensive knowledge in the use of SWAN software and in numerical modelling.

These skills were applied in my master's thesis ("Application of the SWAN model in the characterization of the maritime agitation in Diogo Lopes, Brazil") and in the publication of an article on the subject at the 2nd Hydrographic Journeys of the Hydrographic Institute of the Portuguese Navy (Instituto Hidrográfico da Marinha Portuguesa), in July 2012, where I was also a speaker, and at the 5th Seminar and Workshop on Oceanic Engineering, SEMENGO 2012 (Brazil).

Formação académica

Instituto Superior Técnico

Mestrado, Engenharia Civil

Instituto Superior Técnico

Licenciatura, Engenharia Civil
